

Quod Orbis Continuous Controls Monitoring (CCM)

Complete cyber controls visibility for your
organisation in a single pane of glass

See and understand your security and risk posture in real time with automated, continuous monitoring of all your security controls

- Complete, real-time cyber controls visibility 24/7 – from operational level to board level – via user friendly dashboards
- Dramatically reduced business risk and enhanced security posture
- Audit and compliance automation
- Gartner-recognised risk management technology, delivered as a tailored and scalable Managed Security SaaS, in the cloud or on-premise
- Unique wrap-around service that includes ongoing platform management and risk identification by Quod Orbis experts
- Manage risk with accuracy and confidence and make better business decisions

Key facts and figures

Automation of all control processes

Any framework, any control

Cut costs by around 75%* a year

Rapid ROI in around 5 months**

Seamless integration with your security tools, systems and data

*Compared to annual cost of traditional, manual-intensive approach to cyber security/risk management in a FTSE 500 medium/large organisation with medium to high compliance requirements.
 **Typical ROI/payback for a company with this profile.

Quod Orbis CCM

Complete visibility, plus a managed service that offers your business a unique level of protection

What you get

Security assurance and peace of mind 24/7 via accurate and relevant real-time data from across your business, with expert early-warning support from our experts as we spot potential problems and vulnerabilities.

What you see

Personalised, role-specific visual control status via a configurable, user-friendly dashboard that's as relevant for CxOs as it is for IT, security, and risk and compliance.

What you achieve

Continuous compliance status in real time with significantly reduced business risk and cost, and optimum protection of your operations, revenue, reputation and profits.

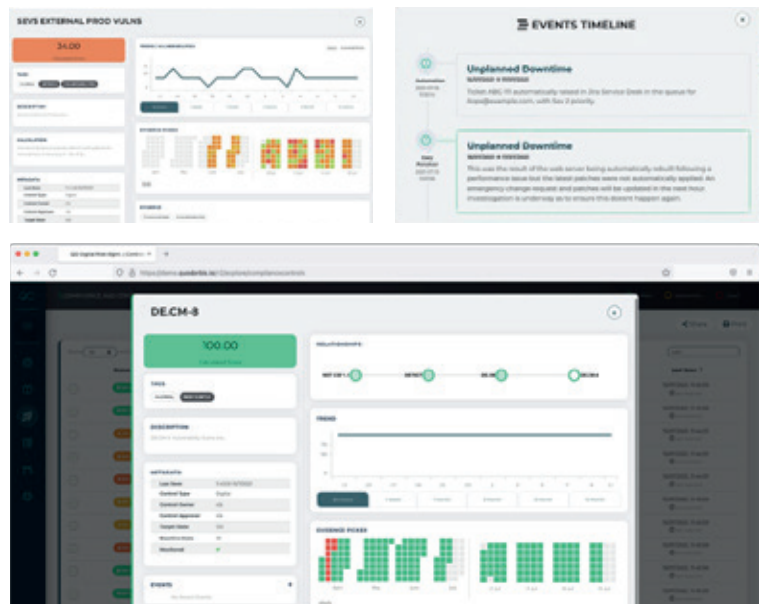

The business value delivered

Quod Orbis CCM delivers value right across your organisation.

- Regulatory – compliance with all frameworks, avoiding costly, point-in-time manual audits
- Risk assurance – continuous assurance in real time, linked to real data
- Accuracy and independence – a reliable, independent view of your control metrics in real time, using data drawn directly from the controls
- Automation – save huge amounts of time, freeing your resources for higher value inputs and reducing operational expenditure
- Financial exposure – minimises the risk of non-compliance and breach
- Brand reputation and profit – minimises risk of brand impact and protects revenues and profits

The unique Quod Orbis CCM 'service layer' difference

Uniquely with Quod Orbis, you also get our continuous wrap-around service. Delivered as a Managed Security SaaS, Quod Orbis CCM really does stand apart in the cyber security marketplace. That's because you not only get the market-leading quality, effectiveness and security of the Quod Orbis CCM software solution itself, but also ongoing platform management from our cyber security experts to ensure your controls remain 100% accurate and effective, plus support with how best to utilise data output from the platform.

About Quod Orbis
