Key facts and figures
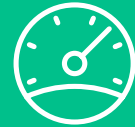

Any Data, Any Framework, Any Control

Automation of control processes

Seamless integration with your security tools, systems and data

Rapid ROI in around 5 months**

Cut costs by around 75%* a year

See and understand your security, compliance and risk posture in real time with automated, continuous monitoring of all your controls.

*Compared to annual cost of traditional, manual-intensive approach to cyber security/risk management in a FTSE 500 medium/large organisation with medium to high compliance requirements.
**Typical ROI/payback for a company with this profile.

Quod Orbis CCM

Complete visibility with our managed platform, offers your business unparalleled levels of continuous assurance.

What you get

A managed platform that connects to any technology, visualising control information to any regulation, risk or performance indicator.

What you see

Personalised, role-specific visual control status via a configurable, user-friendly dashboard, customisable for Board level or for your IT, security, risk and compliance teams.

What you achieve

A single source of truth of your controls state, mitigating business risk and reducing operational costs.

The business value delivered

Quod Orbis CCM delivers value across your business with real-time data

- **Risk assurance** – continuous assurance, linked to real data

- **Regulatory compliance** – with all frameworks, avoiding costly, point-in-time manual audits

- **Accurate and Independent** – Total visibility of your control metrics, using data drawn directly from the controls

- **Automation** – save time, free resource for higher value output and reduce operational expenditure

- **Financial exposure** – minimises the risk of non-compliance and breach

- **Brand reputation and profit** – minimises risk of brand impact and protects revenues and profits

The QO Service Wrap - Our unique difference

Delivered as a managed platform, our CCM is transforming not only the cyber security space but supporting the visibility of your compliance and reducing your risk.

Your business benefits from a collaborative partner that supports your needs now and evolves with you to future proof your ongoing operational needs.

- Customer Success Manager that supports you through onboarding and continues to work with your teams supporting your needs with regular update calls

- Ongoing updates for control frameworks

- Fully managed platform providing the confidence you need that your controls are 100% effective

We scope, we onboard, we continue to support
