Features & Benefits

Any data, any framework, any control

Automation of control processes

Seamless integration with your security tools, systems and data

Personalised dashboards

Any regulation monitored

See and understand your security, compliance and risk posture in real time with automated, continuous monitoring of all your controls.

Quod Orbis CCM

Complete visibility with our managed platform, offers your business unparalleled levels of continuous assurance.

What you get

A managed platform that connects to any technology, visualising control information to any regulation, risk or performance indicator.

What you see

Personalised, role-specific visual control status via a configurable, user-friendly dashboard, customisable for Board level or for your IT, security, risk and compliance teams.

What you achieve

A single source of truth of your controls state, mitigating business risk and reducing operational costs.

The business value delivered

Quod Orbis CCM delivers value across your business with real-time data

- **Risk assurance**
  Continuous assurance, linked to real data

- **Regulatory compliance**
  With all frameworks, avoiding costly, point-in-time manual audits

- **Accurate and Independent**
  Total visibility of your control metrics, using data drawn directly from the controls

- **Operational resilience**
  Automation and monitoring of business processes reduces risk

- **Board reporting**
  Accurate customised exec reporting, identifying effectiveness of investments

- **Automation**
  Save time, free resource for higher value output and reduce operational expenditure

- **Financial exposure**
  Minimises the risk of non-compliance and breach

- **Brand reputation and profit**
  Minimises risk of brand impact and protects revenues and profits

- **Cyber security as a system**
  CCM integrates your entire tech stack into a single unified set of defences

## The QO Service Wrap - Our unique difference
